📅 Date of birth: 10 June, 1991

🇳🇱 Nationality : Dutch

INTERESTED IN

Data Science and Machine Learning

WORK EXPERIENCE (8 years)

Product Owner, Senior Data Scientist

NXP Semiconductors, Netherlands (since Dec 2019)

In this dual role, I lead the development and deployment of **data-driven advanced analytics products**, applying both technical expertise and product strategy leadership across the entire lifecycle

Projects:

- **Revenue forecasting model:** Led the design and development of a time-series forecasting model using statistical, deep learning, and ensemble approaches, automatically selecting the best-performing algorithm to deliver accurate revenue predictions
Business value: 15-25% improvement in forecast accuracy aiding data-driven decision making
- **Project execution speed optimizer:** Led the design and implementation of a KPI-driven analytics model to identify early indicators of project slowdowns by analysing key business performance metrics, enabling proactive issue detection and response
Business value: Doubled the speed of identifying and addressing project execution bottlenecks, improving overall time-to-action and project delivery efficiency
- **Product lifecycle predictor:** Led the development of a machine learning based tool that predicts how a product will perform over its lifecycle — including how long it will stay in the market, when sales will peak, when demand will start to decline and more
Business value: 25% improvement in product inventory management
- **Requirements and test case generator:** Led the creation of an AI-driven system that automatically generates baseline product requirements and test cases using historical product data. The tool also optimizes and categorizes test cases by criticality to improve testing efficiency and coverage
Business value: Reduced manual effort in requirement and test case creation by up to 70%
- Defined the **product vision, strategy, and roadmap** through close collaboration with business stakeholders
- Developed and deployed predictive models leveraging **advanced statistical and machine learning techniques** on complex revenue datasets
- Served as the communication bridge, effectively translating **data-driven insights** to both **technical and non-technical stakeholders**
- Demonstrated a **collaborative, team-oriented approach** by mentoring junior data science enthusiasts

Software Design Engineer

Robert Bosch, India (Feb 2015 – Mar 2017)

- Designed and implemented base software modules for multi-core powertrain systems in embedded C and C++
- Created test specifications and analysed failure logs to identify system problems and resolve design issues
- Collaborated with software design experts to build robust and real-time solutions

EDUCATION

Apr. 2017 – Nov. 2019

Masters in Computer and Communication

Universität des Saarlandes, Saarbrücken (Germany)

Track: Data Science and Artificial Intelligence

Thesis: Data-driven anomaly detection techniques

Robert Bosch GmbH, Renningen (Germany)

Designed a semi-supervised ML framework for anomaly detection from distributed log dataset. Performed outlier score calculation on categorical data using distance-based learning algorithms

Sept. 2009 – May. 2013

Bachelor in Electronics and Communication

Anna University, Coimbatore (India)

Track: Embedded Systems

TECHNICAL SKILLS

Programming	–	Python, SQL, PySpark, C++, Shell script
Cloud services	–	AWS, GCP
Frameworks	–	Scikit-learn, PyTorch, Keras, AutoGluon
Tools	–	Git, Docker, Jupyter, JIRA, ServiceNow, PowerBI, Tableau, Splunk
Applications	–	Time-series forecasting, recommendation engines, clustering and classification, anomaly detection, NLP, MLOps, generative AI
Methodology	–	CRISP-DM, Agile, Scrum, SAFe

LANGUAGE SKILLS

English	–	Fluent
Dutch	–	Intermediate A2
German	–	Intermediate A2

PERSONAL SKILLS

- Analytical and creative thinking
- Self-motivated and quick learner
- Team player with good presentation and communication skills

DECLARATION

I hereby declare that the information given is true to the best of my knowledge and authorize the use of my personal data in accordance with the GDPR 679/16 - "European regulation on the protection of personal data".

Place: Eindhoven
Date : 12 Oct, 2025
